

RENTAL CATALOGUE

2011 / 2012

Welcome...

London Light provides lighting and technical services to production companies, event managers and venues with as much or as little support as you need for a highly successful production.

As this catalogue covers in detail, we are able to supply your rental requirements from our broad stock of lighting, sound, staging and video equipment.

As well as rental, we also have distributor pricing on all major manufacturers' products along with being an authorised ETC console dealer, allowing us to offer competitive pricing.

If you need help along the way we can supply a complete design, implementation and operation service, taking care of all technical concerns from the initial production meeting through to the load-out.

We always offer a one-to-one, personal service - where you have a specific point of contact, who will always try their hardest to recommend the best solutions for your needs, taking into account venue, time or budget limitations.

Please feel free to contact us with your requirements.

The insurance liability of rental equipment is with the customer and must be covered by an appropriate policy for the entire replacement value.

Profiles

Profiles are ideally suited for use in FOH positions as they allow careful control of the beam to avoid spill through shutters. The profile beam can also be hard or soft focussed as needed. Profiles can be used in conjunction with gobos to produce a range of interesting lighting effects.

Fresnels

Fresnels produce a soft-edged beam of light which can be masked as required using barndoors and the beam size is adjustable across a large range. These lanterns are ideal for use over the stage to provide general lighting cover, or for backlight washes.

Week

Selecon Acclaim F	650W 6° -60°	£8.00
Selecon Rama HP F	1200W 7° -56°	£12.00
Strand Alto F	2000W 7° -62°	£15.00

PARs

PARs are widely used for providing strong colour washes and beams of light for effects. They come in a wide variety of sizes, powers and beam angles. Blinders are used to create intense bursts of light at concerts and for special effects on theatre productions.

Scrollers

Scrollers can be fitted to the front of most types of lantern and contain a collection of different coloured filters to allow the beam colour to be controlled from the lighting desk.

They are supplied with a standard scroll containing a combination of pastel and saturated colours. A list is available on request or to download from our website. We are also able to supply custom scrolls as sale item.

Week

Rainbow 2/16 8" Scroller	Up to 16 Frames, PAR 64 / S4 Zoom	£35.00
Rainbow Maxi PSU	700W	£12.50

Moving Effects

Gobo Rotators are used with profiles to spin a gobo within the gate of the lantern. Animation discs are fitted to the front of a fixture to create abstract movement effects such as fire, water and clouds - with imagination and time to experiment these units can produce some amazing effects. Please contact us for more ideas on their use.

Mirror Balls

Mirror Balls produce the iconic ballroom dancing lighting effect, which can be used in a wide variety of dance and musical productions. Most effective when lit from below, using fixtures such as pinspots or profiles, the mirrorball reflects multiple light beams back. Supplied complete with a rotator and safety bonds. Larger sizes are available on request.

Week

300mm / 12" Mirror Ball	£15.00
400mm / 16" Mirror Ball	£20.00
500mm / 20" Mirror Ball	£25.00

Hazers

Hazers produce a fine mist in the air which highlights any beam of light passing through it. Hazers are particularly effective on shows using moving lights, but also enhance light beams from profiles fitted with gobos. Please contact us for pricing on Haze Fluid.

Week

DF-50 Hazer	Oil Based	£120.00
Look Solutions Unique 2	Water Based, DMX	£75.00

Smoke

Rather than just a mist, such as the type produced by hazers, smoke machines produce a more dense type of smoke effect though all units are fully controllable to create anything from a tiny whisper to a thick cloud.

Week
